EXPERIENCE

Software Engineer – Quickway Infosystems

July 2025 – Present

Tech Stack: ReactJs, NextJs, Express, NodeJs, MongoDB, AWS

- Developed and shipped 10+ full-stack features using React.js and Next.js, implementing server-side rendering (SSR) and reusable components, resulting in 30% faster initial page load times and improved SEO rankings.
- Built and maintained RESTful APIs using Node.js and Express, supporting authentication, validation, and business logic for workflows used by 300+ monthly active users.
- Designed and optimized MongoDB schemas and indexing reducing average query latency by 25%.

Software Development Engineer Intern – Amazon

Jan 2025 – July 2025

Tech Stack: Java, Python, FastAPI, REST APIs, React, PyTest, AWS Lambda, DynamoDB

- Designed backend workflows involving data processing, validation, and optimized queries, improving response latency by 30%.
- Implemented core backend services for a centralized, globally distributed ASIN creation pipeline used across 20+ marketplaces, integrating REST APIs and adding unit tests (JUnit) and monitoring hooks to ensure safe onboarding and operational stability.
- Built an internal Offer Visualizer tool that allowed engineers and PMs to query and aggregate offer-level data using dynamic filters; optimized backend aggregation and data-fetching logic to reduce response latency by approximately 30%.

PROJECTS

E-Books Library [GitHub]

June 2024

- Built a digital library enabling authors to upload and users to read books, reducing initial page load time by **35%** through optimized client-side rendering and efficient data fetching.
- Implemented secure file uploads with Cloudinary and real-time data synchronization using React Query, improving data consistency and user engagement by **25%**.
- **Technologies Used:** Next.js, Node.js, React, TypeScript, Tailwind, Shadcn, Cloudinary, React Query

Cargo Shipment Management System [GitHub]

May 2024

- Engineered a role-based cargo management system with real-time shipment tracking using WebSockets and Dijkstra's algorithm for optimal route computation, enhancing security compliance and reducing unauthorized access attempts by **50%**.
- Enabled real-time shipment visibility by streaming live location and status updates over WebSockets.
- **Technologies Used:** Authentication, Dijkstra Algorithm, Knapsack

EDUCATION

National Institute of Technology - Bhopal

Dec 2021 – May 2025

B.Tech in Electronics and Communication Engineering CGPA: 8.54

Bhopal, India

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), TypeScript, C++

Developer Tools: VS Code, Postman, MongoDB Atlas, My SQL, Vite

Technologies/Frameworks: Spring Boot, React, Node.js, Express.js, Next.js

Clouds and Tools: AWS (Lambda, CloudWatch, DynamoDB), Docker, Git

EXTRACURRICULAR

Zenith Programming Club of MANIT

Sept 2022 – May 2025

Bhopal, India

- **Technical Executive**
- Organized multiple coding competitions and workshops, driving engagement among 200+ participants.
